

STARPANELS are 2x2 ceiling tiles used to create a visual night experience. Long-life series wired, 5V lamps (80,000 hours) highlight large ceiling areas with virtually no maintenance. Our semigloss finish wipes clear with a damp cloth. All tiles operate at 24 volt.

TILE - USG Ceramic Heritage (Coast Guard approval 164.009/212/0) panel, with "Ceiling Zero" fire properties or USG OmniFissure Firecode panel with one-hour fire rating. Other tiles upon request.

WIRING - 24-Volt series-wired lamps using solid brass pressure locked crimps. 25G AWG insulated copper wire 12 watts/tile.

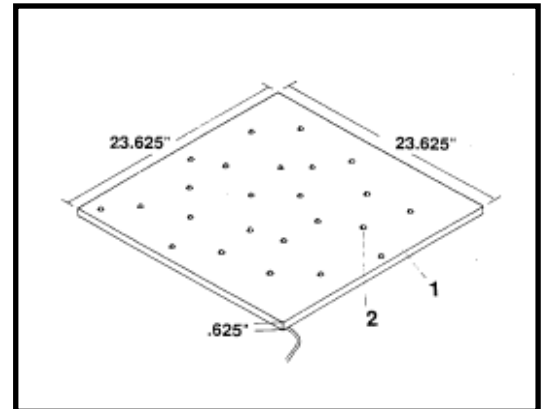

PAINT - Water-based, semi-gloss latex. Black standard. Other colors upon request.

LEADS - 18 AWG stranded TFFN.

LAMPS - 5 Volt T-1, 0.5 watt wire terminal. 24 lamps per panel.

INSULATION - Non-flammable fiberglass lagging fabric.

LISTING - U.L. Listed.

ORDERING INFORMATION

1) All standard 2x2 black Coast Guard-approved STARPANELS with 24 lamps are catalog number #CS-1SP.

2) All standard 2x2 black non-approved Coast Guard STARPANELS with 24 lamps are catalog number #CS-9SP.

3) All variations include holes, color, lamp density, or alternate tile, consult factory for catalog number.
